24. Research Focus:

My expertise is within behavioral health, examining emotional, behavioral, and physiological factors that determine an individuals overall well-being. I specialize in research study design, determining the best process for examining and achieving the desired outcome in a research study.

My expertise extends to a variety of clinical therapeutic areas across the lifespan, including oncology, hematology, chronic pain, diabetes, cardiovascular disease, and cognitive dysfunction to name a few. As a licensed health psychologist, I also have expertise across many domains of mental health, such as depression and anxiety and behavioral health factors such as sleep and health behavior adherence.
